EXECUTIVE SUMMARY

I build web applications with more focus on Frontend flow and data structure than just designing screens. Worked on systems like a Pet Care Management platform and a Complaint Tracking System using Python, Django, and SQL, handling everything from database models and authentication to API integration and frontend implementation. Comfortable turning requirements into working features with structured logic, clean data handling, and responsive UI development. Experienced with MySQL, Git, HTML, CSS, and Bootstrap for responsive web application development.

EDUCATION

MCA – Master of Computer Applications

2024 – 2026

Asan Memorial College of Arts and Science, Chennai, India | CGPA: 8.3

B.Com (CA) – Bachelor of Commerce with Computer Applications

2021 – 2024

Asan Memorial College of Arts and Science, Chennai, India | CGPA: 8.1

SKILLS

Technical Skills:

Languages: Python, JavaScript

Frameworks: Django

Web Technologies: HTML5, CSS3, Bootstrap, Responsive Design

Databases: MySQL, SQLite, PostgreSQL

Cloud Platforms: AWS Basics

Tools & Development Environment: Git, GitHub, VS Code, Chart.js, Postman

Deployment : Netlify , Render , Streamlit

PROJECTS

1. CMS Pro – Complaint Management System

Technologies: Django 5.0, Python, JavaScript, Chart.js, HTML5, CSS3, Bootstrap 5, SQLite, SMTP.

- Developed a 3-tier **RBAC architecture** (Admin, Manager, User) for secure and structured complaint management
- Implemented automated SLA monitoring and overdue complaint alert workflows .
- Built an interactive **Admin Analytics Dashboard** using Chart.js to visualize status breakdowns and resolution rates.
- Integrated automated **SMTP email triggers** and a reporting feature for one-click **CSV/PDF data export**.
- Designed a Glassmorphism-based responsive UI with a built-in feedback system to track customer satisfaction (CSAT)

2. VetSphere – Pet Care Management System

Technologies: Django 5.0, Python, JavaScript, Chart.js, HTML5, CSS3, Bootstrap 5, SQLite, SMTP.

Hosted Application : [VetSphere.com](#) **Project Repository :** [Source Code](#)

- Built a full-stack web application to manage pet records, appointments, and billing across **7 integrated modules**
- Implemented **role-based user authentication** and admin dashboard using Django's built-in auth system for secure data access
- Designed normalized relational database schema with 8+ models and optimized Django ORM queries for efficient data handling and improved application performance
- Integrated **Chart.js** for real-time financial data visualization and clinic trajectory analytics for administrative insights
- Automated email delivery to send dynamic **PDF invoices** (generated via xhtml2pdf) to users upon appointment confirmation

CERTIFICATIONS

- React.js Development – Tech Force Institute
- Employability Enhancement Skills – ACME Academy
